ABOUT

Graduate of the Full Stack Web Development program at HackerU, with specialization in developing web applications on both the client and server sides. Skilled in **MERN stack technologies, software development, SQL/NoSQL databases, TypeScript, and React.** Passionate about continuous learning, problem-solving, and working both independently and as part of a team. Eager to gain my first opportunity in the development field, bringing a strong work ethic, a sense of responsibility, and proven experience in teamwork and team management from previous roles.
